‘Sporting Austin Sevens in Australia’
By Tony Johns.

The Austin Motor Company added a two-seater Sports model Austin 7 to their range in January 1924 with a guaranteed top speed of 50 mph.
The Victorian and Riverina, NSW Austin agents shipped one to Melbourne to promote sales of the small 7 hp Chummy Tourer model.

Around this brief introduction Tony Johns has crafted a fascinating story about the amazing story of Sporting Austin Sevens, starting with the early history of Herbert Austin and his engineering history and going on to the vast story of the amazing car and the Australian drivers who so successfully campaigned them.

Beautifully written by a club member and published by the Austin 7 Club, this book is a must for all who have an Austin 7.

The book has 405 pages and contains a huge variety of photographs, some never seen before- a tribute to Tony and his assiduous research over many years
